WHAT RURAL LOOKS LIKE
**IDaho RxP Law**

**Conditional certificate:** Didactic work (follows 2009 criteria, New Mexico curriculum), 80 hours of physical assessment, 400 hours of supervised prescribing with 100 patients of diverse backgrounds, pass a nationally-accepted exam. With provisional certificate, applicant allowed to practice under supervision. All cases done in collaboration with PCP.

**Certificate:** Two years of supervised practice past the master's degree totaling 2000 hours. To practice with children/teens (under age 18) requires one year of supervised work with a minimum of 25 cases. Same paradigm for a geriatric (over age 65) specialization. All cases continue to be done in collaboration with PCP.

**Idaho RxP Law:** Advisory committee to the Board of Psychology recommends rules; recommends if applicants be given a provisional certificate or unrestricted certificate to practice; advises on endorsement or any other issues requested of it. (Advisory panel consists of 2 psychologists, 2 psychiatrists recommended by Board of Medicine, 1 doctoral-level pharmacist recommended by the Board of Pharmacy)

**Idaho State University Psychopharmacology Program:** Located in the Pharmacy department of Idaho State University's Meridian campus (next to Boise Idaho). First students entered in 2019. Two-year bricks-and-mortar program. Classes on Thursday and Friday. Program includes all coursework, physical assessment module and supervised prescribing placements. The campus is state-of-the-art with its own clinic and advanced training features such as a cadaver lab, digital dissecting tables and 3- D computers that neurosurgeons use to map their procedures.
