CONFIDENTLY INTEGRATE TECHNOLOGY

The MBHR is much more than a QCDR for quality reporting and MIPS submission. Our focus is helping you drive value-based care, ultimately improving patient outcomes. By removing the burden of data transfer, you can better focus on providing the right care at the right time.

HOW WE DO IT

With the MBHR, you will work with experienced, US-based integration and support teams to reduce your reporting burden and drive improved outcomes. We work with all EHRs, practice management systems and revenue cycle management solutions, using our advanced code mapping to get the best results from your data. Track and submit performance data for CQMs and/or eCQMs to maximize your MIPS score.

TIPS & TRICKS

An end-to-end reporting bonus is available for each of the reporting options below. Gain 1 bonus point for each measure that is reported on data coming directly from a 2015 Certified EHR.

INTEGRATION OPTIONS

STANDARD FILE FORMAT

If you can easily export measure performance data in an industry standard file format (HL7, QRDA I, 837/835 billing files), this will allow for an extremely fast and simple upload into the MBHR. These files cannot be edited until they are uploaded into the MBHR, but you will be able to view and edit your data once it has been processed by the system.

SEE MORE OF OUR EASY-TO-USE PLATFORM ON THE NEXT PAGE

SPREADSHEET UPLOAD

The spreadsheet upload option requires the creation of a standard spreadsheet file (.csv, .xls, .xlsx), either by manually creating a file (not eligible for CEHRT or eCQMs) or by export from an EHR, EMR, or billing system. Spreadsheets must include patient IDs, gender, dates of birth, dates of service, CPT codes, and ICD-10 codes. For the patient visit to be complete, codes that define the denominator (visit eligibility) and numerator (performance) must be included. If your system is only capable of exporting the requirements partially, you can manually adjust the data at any time.

PatientID	Date of Birth	Gender	Date of Service	NPI	CPT	ICD10	Flu Screening
